

**Nebraska Department of Health & Human Services  
Chronic Renal Disease Program**

**Reimbursable Drug Formulary  
Effective: February 1, 2023**

The Renal Program reimburses for generics only – unless there is not a generic available. If that's the case, "Brand" will be listed in the "Reimbursable" column.

The Renal Program reimburses at the WAC (Wholesale Acquisition Cost) or SMAC (State Maximum Allowable Cost) rate – whichever is less. If the client payment amount is less than WAC or SMAC – the lesser amount is reimbursed. Any remaining cost after the Program has paid is the client's responsibility.

All medications must be prescribed in order to be reimbursed.

Invoices are submitted to primary insurance providers first (private, Medicare and Medicaid). All requirements from primary insurance providers – *including securing prior authorizations* – must be met prior to invoicing the Renal Program. The Renal Program is the payer after all other insurances have paid their share.

*Medications are listed in alpha order by Generic Name.*
