Mobile Caregiver+ Claims Console Basics

Please review the policies and procedures set by Payers BEFORE completing the **Claims** process. A Provider Administrator should follow the set guidelines of the Payer. This Quick Reference Guide does not replace solution training.

After a visit has been completed, the Provider Administrator has the ability to review, adjust and electronically release the visit as a claim to the Payer via the Work List screen in the Provider Portal.

- If a Provider uses the Mobile Caregiver+ Solution, the Mobile Caregiver+ Claims Console will automatically process and transfer service records to the Work List for Claims Processing. Providers can use the Visits list to troubleshoot missing service records. If successfully transferred to the Work List, the system will display “**SUCCESS**” in the Visits to Claims status field in the Visits option of the Main Menu.
- If a Provider is using an **Alternate EVV System**, Providers must complete the **ready-to-bill** process (send visit data to their Mobile Caregiver+ Provider Portals for claims processing) before the Mobile Caregiver+ Claims Console will process and transfer billable service records to the Work List.

*****Service records that are successfully processed for completed visits will be transferred to the Work List, where they will be screened using Payer defined pre-adjudication rules.*****

Three potential Work List statuses:

1. **New** – Service records that are initially transferred to the Work List or service records that were just edited or updated.
2. **Matched** – Service records that have been screened and are following the defined Payer rules; Matched service records do not have reported errors and can be released for remittance. Only Matched service records can be released for claims submission.
3. **Unmatched** – Service records that have been screened and are not in line with the defined Payer rules; Unmatched service records have reported errors that must be remediated and rescreened to change the status to Matched.

In the **Work List**, a Provider Administrator can click on the service record to expand and view the visit details. Any field in the Work List with the pencil icon  can be edited or adjusted to reflect billable visit data if the actual visit data is inaccurate. All fields labeled as ‘**Actual**,’ is visit data recorded by a mobile device and cannot be adjusted. **Any adjusted ‘Billable’ values will always override ‘Actual’ values and will be sent for claims submission.** Provider Administrators are required to select Reason Codes to provide explanations for changing rendered service data.

Only Matched service records can be released for claims submission. For all Unmatched service records, Providers **MUST** fix all reported errors to change the status to Matched before releasing for claims submission. Follow the steps below for Matched and Unmatched service records.

1. For service records in the status of ‘**Matched**’:
 - a. Select the visit checkbox.
 - b. Select ‘**Release**’.

c. The visit will be released to the Payer and the status can be reviewed in **Claim Review**. The status will change to **'Released'**.

Search List													Rematch	Export	Release	Archive
Row	Recipient Last Name	Recipient First Name	Medicaid ID	Visit ID	Status	Procedure Codes/Mods	Diagnosis Code	Service Date and Time	Authorization Number	Payer Name	Calculated Amount	Billable Amount	Paid Amount (\$)			
1a <input checked="" type="checkbox"/>	MARIE	SOFIA	85971325	3559238369	MATCHED	T1019	A009 A0222 R54	4/3/23, 1:20 PM	2323232323	FLT1	\$12.00	\$0.00	-			

2. For service records in the status of **'Unmatched'**:

a. Click on the Unmatched service record to open it.

<input type="checkbox"/>	1	ROSA	BROOKE	9876543	0500668934	UNMATCHED	T1019 (TF)	A00 A001	2/2/23, 8:59 AM	-	2a	FLT1	\$14.00	-	-
--------------------------	---	------	--------	---------	------------	-----------	------------	-------------	-----------------	---	----	------	---------	---	---

b. Scroll to the bottom of the service record, to the **Edits and Errors Report** error.

Edits & Errors		Visit Requirements		2b							
Type	Item	Error Code	Reason/Error Code	Reason/Error Code Description	Change/Modified On	Modified By	Notes				
CRITICAL	Prior Authorization: Not Found	PNOT	9002	-	2/2/23, 9:07 AM	Calculate Engine	Provider:FLT1-999990332-1999990334 has no PA# for Recipient:FLT1-9876543-19990209 for Date of service:02/02/2023, T1019 TF				
ERROR	Visit: Start Time Variance Greater Than Allowed	VSTR	-	-	2/2/23, 9:07 AM	SQS Lambda	-				

c. Remediate and clear all the reported errors. Refer to the **How to Clear Reported Errors in the Work List** section of this document.

d. Once all reported errors have been resolved, select the visit checkbox.

e. Select **'Rematch'**.

Search List													Rematch	Export	Release	Archive
Row	Recipient Last Name	Recipient First Name	Medicaid ID	Visit ID	Status	Procedure Codes/Mods	Diagnosis Code	Service Date and Time	Authorization Number	Payer Name	Calculated Amount	Billable Amount	Paid Amount (\$)			
2d <input checked="" type="checkbox"/>	ROSA	BROOKE	9876543	0500668934	UNMATCHED	T1019 (TF)	A00 A001	2/2/23, 8:59 AM	-	2e	FLT1	\$14.00	-	-		

f. Rematching a service record will screen the service record against the Payer's set rules again. Once rematched, the visit Status should reflect **'Matched'** and can be released to claims submission.

Claim status after being released from the Work List can be monitored on the **Claim Review** screen. *Voids and Adjustments to claims can also be done in Claim Review.*

Service Records displayed in Claim Review will have one of nine statuses:

1. **Released** – Billable service records that have been released from the Work List but have not yet been submitted to the Payer.
2. **Submitted** – Billable service records that have been submitted to the Payer.
3. **Accepted** – Billable services that have been accepted by the Payer, which are then considered as claims to be reviewed for adjudication. Claims that are accepted by the Payers are assigned Internal Control Numbers (ICN) to be used for identification.
4. **Rejected** – Billable services that have technical errors, such as incorrect or missing data will be labeled as “Rejected;” Rejected service records are returned to the Mobile Caregiver+ Work List for remediation.
5. **Denied** – Claims that the Payer accepted, reviewed, and adjudicated to deny (refuse) payment for. Claims may be denied for untimely submission, duplicate claim submission, etc.
6. **Paid** – Claims that the Payer accepted, reviewed, and adjudicated to remit the full amount.
7. **Paid Partial** – Claims that the payer accepted, reviewed, and adjudicated to remit partial payment for. Providers may choose to adjust partially paid claims.
8. **Adjusted** – Paid or Partially Paid claims that a Provider has edited (made changes to_ and resubmitted for adjudication).
9. **Voided** – Paid or Partially Paid claims for which a Provider has voided (reversed) payment.

How to Clear Reported Errors

For all **Unmatched** service records, Providers MUST remediate all reported errors to change the status to Matched. There are two types of rules the Provider Administrator could encounter in the Work List:

Please review the [MCG+ Claims Console User Guide](#) for step-by-step instructions on how to clear each error.

1. **ERROR** – Can be cleared with a reason code. Error appears blue and can be clicked on to display a dialogue box with available reasons to clear the error. ***** Some of these errors must be cleared by first adjusting data within the Service Record and then clearing the error message. *****  ERROR
2. **CRITICAL** – Can only be cleared with a visit data change/update within the service record. The error appears gray and is unable to be clicked on. This rule type must be cleared by adding to or adjusting visit data within the service record, to meet the minimum requirement by the Payer.  CRITICAL

The following instructions show how to clear a **CRITICAL** and **ERROR** message.

1. **PNOT – Prior Authorization: Not Found**

- a. The PNOT error message indicates that no valid authorization was found for the Recipient based on the Procedure Code/Mods listed in the service record.

- b. As it is marked as a **CRITICAL** error, the visit data within the record needs to be cleared. To clear the PNOT error requires the active Authorization on file for the member and service code, to be attached to the selected service record.
- c. Select the pencil icon next to the **'Manual Override PA#'** field to open the *Edit – Billable Time, Procedure Code/Modifiers, and/or Prior Auth* dialogue box.

- d. Select the checkbox next the **'Select Authorization'** field to display authorizations on file for the member and select the authorization for services.
- e. Select the **'Reason Code'** to provide an explanation for the change and enter a **Note** if applicable.

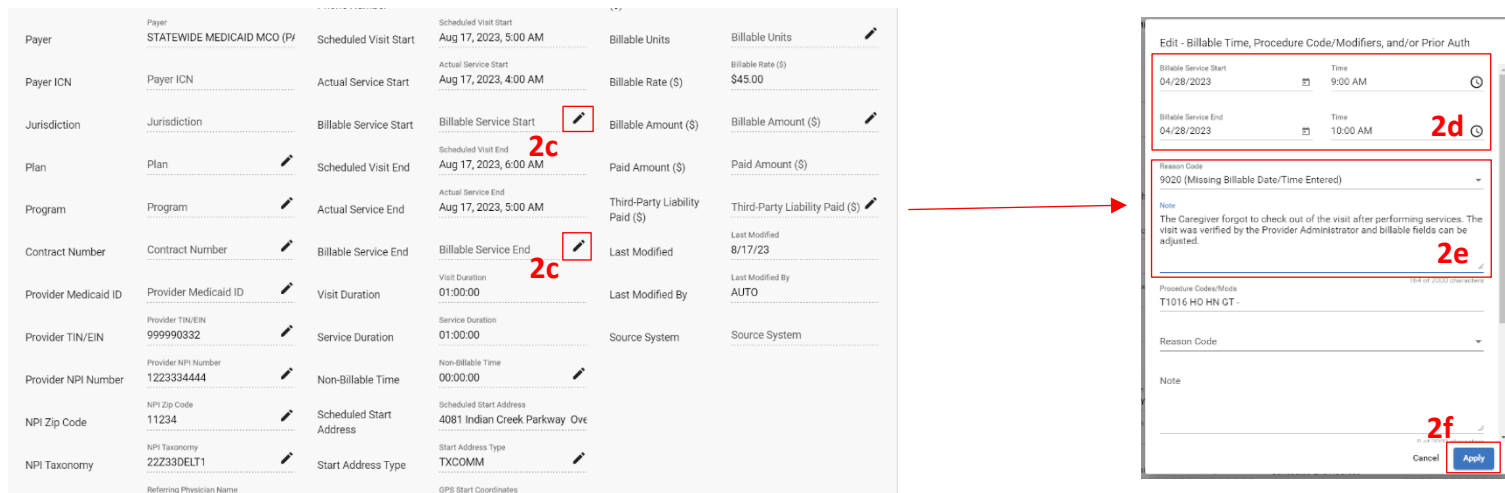

- f. Verify the **Procedure Code** is the correct code that is attached to the selected Authorization. If not, use that field to update the Service Code and provide a reason and note for updating the field.
- g. Click **'Apply'** to clear the CRITICAL error.

2. VSTR – Visit: Start Time Variance Greater Than Allowed

- a. The VSTR error indicates the time variance is too large between Scheduled Service Start/End time and the Actual Visit Start/End time. Check with the Caregiver to verify the reason of a wide time variance. If a valid reason is given, the User can continue clearing the error message.

- b. As this is seen as an **ERROR** with the respective icon, , a User can clear the error by clicking on the icon. ***** This error message requires an adjustment in visit data of the service record BEFORE clearing the message. *****
- c. The Billable Service Start and End time need to be adjusted BEFORE the error message is cleared. Scroll to the **Billable Service Start** or **End** fields, and click the pencil icon by the field, to open the *Edit – Billable Time, Procedure Code/Modifiers, and/or Prior Auth* dialogue box.

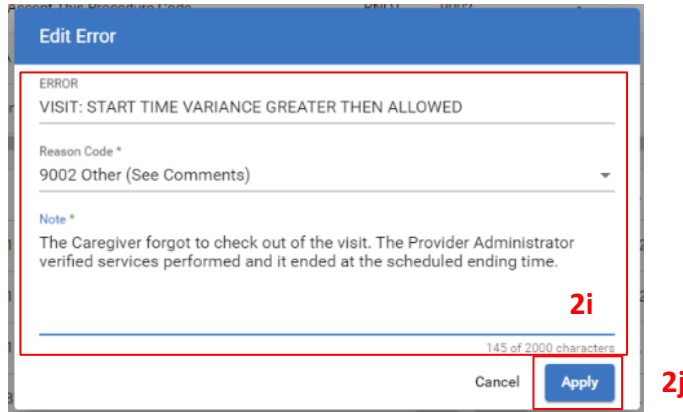

The image shows a service record form on the left and a dialog box on the right. The form has several fields with pencil icons for editing. Two fields, 'Billable Service Start' and 'Billable Service End', are highlighted with red boxes and labeled '2c'. The dialog box on the right is titled 'Edit - Billable Time, Procedure Code/Modifiers, and/or Prior Auth'. It contains fields for 'Billable Service Start' (04/28/2023, 9:00 AM) and 'Billable Service End' (04/28/2023, 10:00 AM), both labeled '2d'. Below these are 'Reason Code' (9020 (Missing Billable Date/Time Entered)) and a 'Note' field containing the text: 'The Caregiver forgot to check out of the visit after performing services. The visit was verified by the Provider-Administrator and billable fields can be adjusted.' This note is labeled '2e'. At the bottom of the dialog box, there is a 'Reason Code' field and a 'Note' field, with the 'Apply' button highlighted in red and labeled '2f'.

- d. Enter the Billable Service Start and/or End date/time to be billed in the **Billable Service Start** and **Billable Service End Date/Time** fields.
- e. Select a **Reason Code** and enter a **Note** if required.
- f. Select **'Apply'** to save the changes and close the dialogue box.

g. Scroll back down to the **Edits and Errors** and click the error icon, , to clear the message.

h. Fill the **Reason Code** and **Note** fields to provide further details in order to clear the message. Click **Apply** to save and clear the error message.

2i

2j

3. Once all errors have been remediated, the service record must be rematched and once the status has been updated to Matched, the service record can be released. *Review instructions on page 1 and 2 for the rematching instructions.*

The list below shows the other potential errors that may appear. These errors can be remediated by using one of the methods explained above with the difference of error specific changes.

- **PUNT: Prior Authorization: Not Enough Units** – The number of service units that have been withdrawn from the Prior Authorization exceeds the total number of authorized units for the service.
- **RNOT: Claim: Payer Not Configured to Accept This HCPCS Code** – The assigned service code is not configured to the Payer.
- **SBAK: Scheduling: Backdating Limit Exceeding** – The service date exceeds the cut-off date for timely submission.
- **VDGC: Recipient Missing Diagnosis Code** – The service data does not contain the Recipient's Diagnosis Code.
- **VCOV: Caregiver (Provider): Scheduled with Overlapping Recipients** – A Caregiver was scheduled in two or more overlapping visits.
- **VDUR: Visit: Service Duration Less than Minimum Allowed by Payer** – The recorded service duration time is below the minimum time the Payer has set for billing for one unit of service.
- **VLOC: Visit: Start/End Location Other Than Scheduled** – The Start Variance between the visit's Scheduled Start/End Address and the Actual Start/End location.
- **VROV: Recipient: Scheduled with Overlapping Caregivers (Providers)** – The scheduled Recipient has two or more overlapping visits.
- **VVER: Visit: Missing Start and/or End Verification** – The service record is missing an EVV check-in and/or check-out time for the billed service.

How to Add a Revenue Code to a Claim for Rendered Services

- Depending on the Procedure/ Service Code listed on a claim, a Revenue Code **MUST** be added before releasing a claim. Revenue Codes must match the Procedure Code listed in a claim. Revenue Codes communicate the setting of where a service was performed for the Recipient.
- ATTENTION:** Every NE MCO will have their own Revenue Codes for Procedure Codes. Each MCO's Revenue Code will display on the following pages, outlining the Procedure Code that matches.

The left screenshot shows the 'Work List' interface. A red box labeled '1' highlights the 'Work List' tab in the main menu. Another red box labeled '2' highlights the search panel, which includes fields for Member(s), Payer ICN(s), Add Payer ICN, Status(es), Select Status, Procedure Codes, Select Procedure Code, Visit ID, Enter Visit ID, Authorization Number(s), Add Authorization Number, Actual Service Start, From, Actual Service End, To, and buttons for Search, Clear, and New Claim. A third red box labeled '3' highlights a row in the search list table.

The right screenshot shows the 'Details' view for a claim. A red box labeled '4' highlights the 'Revenue Code' field in the 'Technical' section, which is currently empty. A red arrow points from this field to the 'Edit - Revenue Code' dialog box shown in the next block.

- Log into the **Mobile Caregiver+ Provider Portal** and click on the **Work List** tab from the Main Menu.
- Use the **Search Panel** to locate the claim that needs a revenue code added.
- Click on the claim record.
 - All details regarding the selected claim will display.
- Click the edit icon next to the **Revenue Code** field.
- The **Edit – Revenue Code** dialogue box will appear.
 - Type the Revenue Code that matches the listed Procedure Code for the respective claim.
 - Select a reason for adding a Revenue Code in the **Reason Code** field.
 - Add a **Note** if needed, to further explain the Revenue Code.
 - Select **Apply** at the bottom of the dialogue box.

Edit - Revenue Code

How to Add a Referring Physician for Rendered Services

- Depending on the Procedure/ Service Code listed on a claim, a Referring Physician **MUST** be added before releasing a claim. 

The screenshot shows the 'Recipients' list in the Mobile Caregiver+ Provider Portal. The 'Recipients' tab is selected in the main menu. The search panel is used to locate a recipient. The 'Edit Recipient' screen shows the 'Referring Physician' tab, where existing referring physicians are listed. The '+ Add Referring Physician' button is highlighted, leading to the 'Link Referring Physician' dialog box.

- Log into the **Mobile Caregiver+ Provider Portal** and click on the **Recipients** tab from the Main Menu.
- Use the search panel to locate the Recipient that needs a Referring Physician added.
- Click on the action's icon to the right of the selected Recipient.
- Select **Edit**. The General information of the selected Recipient will display.
- Click on the **Referring Physician** tab. All current Referring Physicians linked to the selected Recipient will display.
- Click on the **+ Add Referring Physician** button.
- The system displays all existing Referring Physicians. If there is an existing Referring Profile that displays, click **Link Physician**.
- If there is no existing record for the Referring Physician, click on the **Add Different Referring Physician** button.
 - Enter all the required information for the Referring Physician.
 - Click **Save** to link the added Referring Physician to the selected Recipient's EVV profile.

The 'Link Referring Physician' dialog box shows a table of existing referring physicians. The 'Add Different Referring Physician' button is highlighted, leading to the 'Referring Physician Not Found' dialog box. This dialog box has fields for Referring Physician First Name, Referring Physician Last Name, Referring Physician ID, and Referring Physician NPI Taxonomy, along with a 'Set Referring Physician as Primary' checkbox and 'Save' and 'Cancel' buttons.

ATTENTION:

- Referring Physicians can be added to scheduled visits in the **Add New Visit form**, Section 1.
- Referring Physicians can be added to separate claims in the **Work List**.

To review these steps, please visit the Mobile Caregiver+ Provider Portal and Claims Console Full User Guide.
